### FLEXIBLE MAY HOLIDAYS

The registration period has now expired, the Blue Line is happy with the registrations.

#### What can parents and students expect?

Have you registered your child? Then you will receive a confirmation of placement on April 26. It states on which days your child is expected at school.

The students are clustered per grade and linked to a teacher.

This information can be found on the confirmation of placement.

During the Flexible May holiday, the regular school hours apply from 08.30 to 14.15. Learning labs and community school activities are canceled this week.

Give your child gym clothes every day in the week of May 10, Miss Lisette has put together a nice fitness program and will do more exercise education with groups of children during the flexible May holiday. We also do yoga, music and bevo!

#### Can I still register my child?

The registration period has expired, have you registered your child but have not yet received a confirmation in the week of April 26?

Then contact the school or

send an email to [yakantie@deblauwelijn.nl](mailto:yakantie@deblauwelijn.nl).

## SCHOOL DENTIST

The school dentist is back at school after the flexible May holiday!

Twice a year, the dentist from the Youth Dental Care Amsterdam comes to school. You can register your child on the website of the Youth Dental Care Amsterdam or with the help of the registration cards that are distributed. The dental check-ups and any treatments are then done at school. After the primary school period, your child can go to one of our permanent practice locations until he or she is 18 years old.

Practical information:

Jeugd tandverzorging Amsterdam

Contact: 020 6166332 (also for emergencies)

Email: [ctan@jtv-amsterdam.nl](mailto:ctan@jtv-amsterdam.nl)

Website: [www.jtv-amsterdam.nl](http://www.jtv-amsterdam.nl)

North: Markengouw 245D

East: Stephensonstraat 35

West: 53 Derkinderenstraat

West-Osdorp: Tussen Meer 8

## SCHOOL TRIP WILL BE COMPLETED DIFFERENTLY

On Friday, May 21, the school trip for groups 1 to 7 is scheduled according to the school calendar. In consultation with the parent council, we have chosen not to go to the amusement park with our students this year. We think it is still too restless with all the infections around Covid. Of course we want to organize something fun. That is why we have decided to have a nice sports and games day at the end of this school year.

The parent council, together with the team, will ensure corona-proof activities.

This way our students get a nice year-end close.

You will be informed as soon as the schedule is known.

## BREAKFAST IS A MUST

A good breakfast is important for everyone, but especially for school-going children. If children do not eat breakfast, they have difficulty concentrating. This could affect performance at school. In addition, children are less often able to make conscious food choices when they are hungry. For example, they eat snacks that contain a lot of fat and energy, but few vitamins and minerals. By not eating breakfast, a child can gain weight, this has been proven by research. There are children who unfortunately still come to school without breakfast or an unhealthy breakfast.

At school, the children are offered fruit and vegetables every day.

Do you also contribute to a healthy lifestyle?

## CLOSURE THEME FUN PARK

Last week was the closing of the theme amusement park in the basement. What a party it was! The children all received cotton candy just like Sil in the amusement park.

They danced and enjoyed. Miss Judith had crazy glasses and a crazy dress on her head. How the children laughed at her! Feast, Feast, Feast, such a delicious cotton candy! We eat fruit and vegetables every day, but a treat every now and then can't hurt ...

## PARENT MEETING VEILIG LEREN LEZEN

A few weeks ago there was an online meeting about Safe Learning to Read. Few parents were present at the time. There is another chance next week !! During the meeting I will tell you what the children are working on in the classroom and how you can get started at home. So that your son or daughter learns to read even better!

### ONLINE PARENTAL MEETING LEARN SAFELY TO READ

**THURSDAY, APRIL 29 13.00 - 13.45**

I hope to meet you online next Thursday.

Kind regards, Femke Somers the parent consultant

## ALLES-IN-1 ANIMAL ONLINE PARENT MEETING

Info: Life on Earth

A long time ago there were no animals.

First, tiny animals emerged in the sea.

Billions of years later, snails, jellyfish and crustaceans arrived.

These animals had no bones. They are invertebrate.

The first vertebrates are the fish. Then came the first real land animals: the reptiles.

Lizards, snakes, and crocodiles are reptiles.

Still later, flying beasts and the mammals came. Mammals give their young milk.

A fossil is an imprint in a stone of an old shell, animal or plant.

People have found fossils. Because of this we know what used to live on earth.

The change from tiny water creatures to all animals on Earth went very smoothly slowly. We call the development of life on earth evolution.

Extra Info: All monkeys

Monkeys are mammals. There are more than 220 varieties.

They live in groups. An adult male is usually in charge.

The young are protected by the whole group.

Most monkeys eat leaves, fruits and nuts.

Some monkeys eat meat. They don't drink much.

Great apes do not have a tail and are smarter than other monkeys.

There are five different types of great apes:

- the chimpanzees
- the gorillas
- the orangutans
- the gibbons
- the bonobos

**Tuesday May 18 is the online parent meeting All-in-1 Animals from 13.00-13:45 hours.**

Would you like to know what the ALL-in-1 method entails and how you can connect with your child at home?

**PARTICIPATE ONLINE!** Click on the link to participate.
