Thursday 17 June	Learning lab tables, technical reading and learning lab PO-VO from 2.30 pm to 3.30 pm.

DE BLAUWE LIJN IS GROWING

Beautiful new homes have been built around our school and we notice this because our school is getting bigger.

This was very exciting because we didn't have any extra rooms and we like to keep the groups small. Fortunately, we can proudly say that we are getting 4 more classrooms.

Next school year we will start with 4 kindergarten groups and two groups per other grades.

Group 3a and 3b, 4a and 4b, 5a and 5b etc.

Classes will therefore not be larger than 23 students per group.

We are very happy with it!

EUROPEAN FOOTBALL CHAMPIONSHIP 2021

European Football Championship will soon start from 11-06-2021 to 11 July 2021. The practice matches are already in full swing with a less good start for the Netherlands.

The Netherlands played 2-2 against Scotland in the friendly match. On Sunday, June 13, the Netherlands will play against Ukraine, which will be an exciting match.

De Blauwe Lijn keeps a close eye on developments around the European Championship, we hope that the Netherlands will finally win the cup! The last victory of the Netherlands during the European Championship was in 1988 against the Soviet Union

CAMP GROUP 8

Camp preparations are in full swing. This year we are going to “De Haverkamp” in Hengelo. We will do this from **Monday 21 June to Wednesday 23 June.**

You have now received a letter to arrange the payments for camp.

The total amount including voluntary parental contribution is **€150.**

In consultation with the parent council, it has been decided to include the amount of the parental contribution from last school year in the payment for camp.

Is there still an amount left? You will receive a letter with the amount that is still outstanding.

You can transfer the amount to account **number NL47INGB0009216405** in the name of **Stichting beheer ouderraadsgelden**, stating 'School camp group 8' and the name and group of your child.

Do you have a Stadspas? Pay € 55 for the parental contribution with the Stadspas.

The students can only join if the amount has been paid before June 16 or it has been agreed how and when the amount will be paid.

SCAN YOUR CITY PASS

We notice that the city passes have been scanned less this school year than last year.

Parents are often asked whether the credit of €55 will be at the expense of their clothing voucher or student allowance, this is not the case.

Paying the parental contributions with the city pass is a separate arrangement that is separate from your other credits. If you do not scan your city pass, the credit for that year will be lost and will not be refunded.

This school year we have decided that students from group 8 can pay with the city passes already scanned in last school year and this school year. This leaves only an amount of €45 euros instead of €95 euros.

It is therefore very important to scan your city pass with us at all times, you will not lose anything. **Especially for group 7, your city pass credit will then be taken to camp next school year!**

REPORTING CALLS

The report conversations for the toddlers will start in the week of June 21, you will receive an invitation via Kwieb to choose a time slot.

From June 28, the report conversations of the other groups will take place, you will also receive an invitation via Kwieb to choose a time slot.

Would you please return the report folders take to school? Lost your report folder? Unfortunately we have to charge € 5 euros for a new folder. So keep your folder safe!

WELCOME MIRAÇ ARAS

On May 23, Miss Gamze welcomed her baby Miraç Aras.

Miss Gamze and the baby are both doing well. Big sister Gülçe Lina is also doing her very best!

Congratulations teacher and enjoy all the beautiful moments and developments together.

BLAUWE BIJTJES

Anouar, Jahdiel and Von Mathew have moved on to group 1. We wish you a lot of success in primary school!

We welcome Fasih (Blue Bee 1) and Diqvan (Blue Bee 2) to the group.

Last week we started with the theme "What are you wearing today?"

Clothing is central to this theme.

The children learn to dress and undress in a playful way. Recognize their own clothes and that of each other. We will then discuss this with each other.

Tips for home:

- Naming items of clothing.
- Stimulate self-dressing and undressing.
- Help with the laundry.

Sincerely,
Pedagogical employees
Blue at 1 and 2

ALLES-IN-1 THEME ANIMALS " REPTILES, AMPHIBIANS AND FISH "

Amphibians

Salamanders, frogs and toads are amphibians.

Amphibians can live on land and in water.

On land they breathe with their lungs.

Under water they breathe through their skin.

The skin is thin and dries out quickly.

Therefore, they live in a wet environment.

They lay eggs. The larvae hatch out and they change shape a few more times. This is called a change (metamorphosis).

Salamander

Coldblooded

Amphibians are cold-blooded. They can't keep themselves warm.

Therefore, hibernate.

They then cool down and hardly breathe.

They then make a kind of antifreeze in their bodies, so that they do not freeze.

The common toad is a bit poisonous (dirty to enemies).

A bright color warns enemies of a poisonous slime film.

The bright yellow mini frog from South America is the most poisonous animal on earth.

Golden Frog

Reptiles

Snakes, crocodiles, lizards and turtles are reptiles.

They have tough skin with scales and are also cold-blooded.

Most reptiles live in areas that are very warm.

They are almost all carnivores.

They lay eggs in a warm spot on land or in plant debris.

After birth, the little reptiles have to take care of themselves right away.

The chameleon can change color.

Then he says, "Go away!" or rather, "Do you like me?"

Cobra

Alligator

Giant tortoise
